POLY`TECH
DECORATIVE EPS ITEMS

Decorative EPS Cornices

The quality of our EPS is easy to install, high in quality and weather resistant; where the body of the EPS is made of weather resistant Palustrine to resist high temperatures and uses a thermal insulator as well as external protection layer of acrylic that are characterized with high resistance to weather and humidity.

POLY`TECH
DECORATIVE EPS ITEMS

It is also featured with strong bonding with the walls after installation where it reacts with the installed Polystyrene materials which are difficult to disintegration after installation.

Our EPS is characterized with the possibility of adopting & implementing different & unique designs and sizes with suitable cost; since INTEGRATION offers various quantities upon need in record time with affordable cost in comparison to GRC and GRB.
